Subject: PERSONNEL SECURITY SUBCOMMITTEE
PROJECTED TASKING FOR
JULY 1982 THROUGH JUNE 1983

My staff and I have reviewed the listing prepared by the Personnel Security Subcommittee setting forth ten tasks it proposes to address during the coming year. As you indicate in your letter of June 29, 1982, these tasks will be addressed according to guidance furnished by you or the Security Committee.

We rank the listing of these tasks in the following priorities, some of which are combined because of commonality:

1. h. Propose a draft replacement of Executive Order 10450 encompassing all aspects of the Federal personnel security program (employability, clearability, etc.), specifically to include the needs of the Intelligence Community.
2. f. Pursue polygraph initiatives and the applicability of the polygraph to the Intelligence Community personnel security program. Included in this effort will be research and education as necessary to achieve broader use of the polygraph within the Intelligence Community.
3. j. Coordinate 4C programming to ensure its compatibility with the adjudicative and clearance/access needs of the Intelligence Community.
4. a. Improve and update the SCI Adjudicators' Conference as an ongoing effort.
b. Establish a training course for adjudicator trainees and interns that encompasses both collateral clearance and SCI access eligibility considerations.

5. d. Conduct an ongoing review of DCID 1/14 to ensure that its standards and requirements continue to meet the needs of the Intelligence Community.
5. e. Consider the feasibility of establishing reasonable standards for granting exceptions to DCID 1/14 concerning non-U.S. citizenship of family members of those persons applying for SCI access.
6. c. Examine the personal liability of investigators, adjudicators and other personnel security officers vis-a-vis the Federal Tort Claims Act. It is intended that this examination culminate in the presentation of a short (two or three days) seminar about the legal principles that impact on personnel security officers, to include personal liability, constitutional rights, investigative sufficiency, etc.
 6. i. Address the problem of personnel security investigators, who normally are not law enforcement officers, obtaining local criminal history information.
7. g. Conduct a follow-on evaluation and data analysis of the 1980 Investigative Standards Working Group Personnel Security Survey.
